5 YEARS WARRANTY

WaterMark
AS/NZS 3497:1998
No. 23448

BENEFITS

- ✓ Water feels softer.
- ✓ Softer skin and hair.
- ✓ Better tasting tea and coffee.
- ✓ Clean and clear shower glass.
- ✓ Less scrubbing.
- ✓ Reduce scale build up.
- ✓ Cleaner and softer laundry.
- ✓ Longer-lasting appliances.
- ✓ Better lather and soap action.

Reduces visible scale.

3-Stage Whole House Water Filtration System with Stainless Steel Cover

Including Installation ^{1, 2}

CLASSIC

\$2995

PREMIUM

\$3195

Removes hardness & limescale (Calcium Carbonate) 100% Guaranteed.

Water Softener with 2-Stage Pre-Filtration System with Stainless Steel Cover

Including Installation ^{1, 2, 3}

CLASSIC

\$4400

PREMIUM

\$4600

The whole house filtration system is a "point of entry" system that purifies all water (Town, Bore, Dam, and Rain) before pipes divert into your home or business; the whole house system cleans your water from the source. This means you can enjoy filtered water from every tap in your home.

Preferred option for new builds and home renos!

For alkaline water and fluoride removal, add a Compact Reverse Osmosis for only \$595.

\$595

For customers looking for alkaline water (pH>9), a 99.99% fluoride and hardness removal as well as sweet tasting water (Bottled-like Water). The purchase, installation and maintenance of the system will be a fraction of a full-size reverse osmosis.

Consider having a 3 Way Mixer to avoid drilling a hole for a separate drinking faucet.

Alkaline Water

Certified Reduction Claim

- ✓ Fluoride
- ✓ PFAS
- ✓ Antibiotics
- ✓ Hardness
- ✓ Salt & Silica
- ✓ Nitrates & Nitrites

SPECIFICATIONS

Dimensions:
200 H x 300 W x 100 D mm
Connects To: Cold Water Line
Membrane Flow Rate: 16L/h
System Outflow Rate: 3 L/min
Min. Operating Pressure: 35 psi

MAINTENANCE RO

- 1st Stage: Carbon Filter (Every year)
- 2nd Stage: Membrane (Every 3 years)
- 3rd Stage: Alkalising Filter (Every 2 years)

Replacement Filters Bundle

\$270

\$399

\$165

\$299

Filters last up to 18 months. Replacement frequency also depends on water quality and usage.

Notes

- ¹ Installation is available in Perth, Sydney, Brisbane and Gold Coast.
- ² Terms and conditions apply for installation included in price (Special location requests can incur extra charges).
- ³ Power Point for water softener is not included.

SPECIFICATIONS

Flow Rate: 50-60 LPM
Connection Type: 1" or 3/4" Ports
Operating Pressure: 80 psi (620 kPa)
Operating Temperature: 2°C - 52°C (protect from freezing)
Filter Life: Up to 300,000 litres in city/town water

1st Stage

ALGAE

DIRT &
SAND

RUST, SILT,
MUD & CLAY

Sediment Filter

100% Polypropylene Triple Gradient Sediment Filter for the most efficient reduction of dust, dirt, rust, algae and sand.

- Removes particles down to 5 microns.
- Made with materials complying with NSF/ANSI Standard 42.

200% CAPACITY FILTERS

20"

10"

20" x 4.5" filters offer 200% capacity when compared to 10" x 4.5" filters

Please note our new whole house systems are 20" in height, giving you as twice as much contact time, flow rates, longevity and chemical removal rates, compared to old technologies and components used in older 10" systems.

New systems also come with a durable Stainless Steel Enclosure (not plastic), that will not bend over time, to protect housings from extreme conditions and UV rays. They also come with Stainless Steel Components rather than plastic for maximum durability.

2nd Stage

VOCs

CHLORINE,
TASTE & ODOURS

HERBICIDES &
PESTICIDES

Carbon Block

Carbon Filters for the most effective reduction of chlorine, volatile organic compounds, pesticides, herbicides, taste, colour and odour from water.

- Made with compliant raw materials using cutting-edge methods resulting in premium performance, reliability, adsorption and flow rates.
- Made with materials complying with NSF/ANSI Standard 42.

3rd Stage: Classic

VOCs

CHLORINE,
TASTE & ODOURS

HERBICIDES &
PESTICIDES

Silver Carbon

Silver Impregnated Carbon Filter for the most effective reduction of chlorine, taste, odour, volatile organic compounds, herbicides, pesticides.

- This filter is bacteriostatic. This means that it will prevent the reproduction and growth of bacteria within the filter.
- Made with materials complying with NSF/ANSI Standard 42.

Big Carbon filters employ a high-grade carbon with industry-leading surface area, allowing for the most exceptional efficiency of the carbon absorption. The higher surface area extends the life of the cartridge, maximizing the time between cartridge changes.

Carbon Filters are also Tested and Certified by NSF International under NSF/ANSI Standard 42 for material requirements only.

3rd Stage: Premium

CHLORAMINES

CHEMICALS

BACTERIA &
VIRUSES

PARASITES

HEAVY
METALS

Aragon features the latest technology in water filtration. The media combines mechanical, ion exchange, adsorption, and electric adsorption filtration methods. Each filtration method removes different contaminants to deliver high quality drinking water.
